

Action Project of Yuva Paryavaran Leader Students

Amisha Rawat, 8th std
The Millennium School
Lucknow

Theme- Waste Management

Objective- To tackle the problem of dumping the waste in open and promote the proper segregation of waste.

Need of the action plan- This project will address few solutions towards handling various types of environmental pollution and waste products. This project will enlighten us to various problems like disposal of waste in open environment which is adversely affecting the soil, water, air and ultimately health of people in many ways. This project will benefit the environment and people around us by keeping the environment neat and clean leading to a better hygienic life to all. The job of the people is to take the responsibility of disposing the waste in a proper way and abide by the system as cited in this project, to get the desired result. This project will benefit everyone not temporary but forever, if applied as a routine practice in our daily lives.

How you will achieve it-

1. With the consent and approval of the school Management, we will put four containers.
2. These containers will be put at designate
3. All the people will be aware of dumping the waste in these containers and nowhere else.
4. Anybody who violates the rule will be fined.(not more than 100 rupees)
5. We will identify and coordinate with the rag pickers or contractors of that area to collect this segregated waste and transport it for recycling or energy or gas generation on regular basis.
6. This will be taken as pilot project and later on can be adopted by government by using bigger containers with hydraulics truck to lift the containers on daily basis.

This will completely remove the waste from our surrounding areas and create a neat and clean environment.
