

# Action Project of Yuva Paryavaran Leader Students

**Ananya Srivastava**, 11<sup>th</sup> std  
Canossa Convent Girl's Inter College  
Faizabad  
Class-  
**Theme-** Power Conservation

## Objective-

1. To save the water as well as electricity which is the combined result of many resources.
2. To plant more trees and new saplings in order to make this resources pollution free.
3. To make students of many primary schools as well as senior sections and people of society aware of wastage of these.
4. To tell them the proper use of these energy resources.
5. To stop erosion of soil by planting more trees.

**Need of the Project-**We can not suppose our earth without natural resources which give us energy used in every field and most important even in daily life.

“IN ORDER TO SAVE THESE RESOURCES WE HAVE TO CONSERVE THE ENERGIES MADE FROM THEM.”

And for this we have to take a well planned action regarding this. We will need a plan to fulfill our goal i.e. Energy Conservation .

With this project here is a project – a well planned project- to solve the one of the most important problem that is “DECREASING PERCENTAGE OF NATURAL RESOURCES

## How you will achieve it-

1. We will make some posters from recycled papers and will stick them in the schools.
2. We will try to convince people to use solar panels and to make least or no wastage of electricity.
3. We will plant more trees.
4. We will make people aware of water, soil, plants and its importance.
5. We will inspect the affect of our action plan regularly in the respective schools
6. We will make some leader in those schools to take care of the plan and they will be rewarded for that, as small children are encouraged by rewards.
