

# Action Project of Yuva Paryavaran Leader Students

**Arun Pandey**, 10<sup>th</sup> std  
Shree Mahaprabhu Public School  
Allahabad

**Theme-** Land Pollution

**Objective-** We will concentrate to ban the excessive use of chemical fertilizers and injections in farming and agriculture.

**Need of the project-** Project contains campaigns which will bring awareness among the local and village farmers so that they should understand the harmful effects of excessive use of chemical fertilizers on our environment. It will help them to get the knowledge about the use of **Bio-fertilizers** and also about **soil fortification** to enrich the soil with proper fertility.

This project will help them to understand the importance social health and sustainable development. Once started it will give benefit for about a long time as once the mind of people change it will remain for a long time.

**How you will achieve it-** The main aim of our project is to make less use of chemical fertilizers in the agricultural sector to protect aquatic life, soil erosion, and human life from being dead. For this purpose we will organize **seminars** at different level, **surveys** and some **organizations** to give information to agricultural farmers.

We will provide lands for making manures and also for composting. We will run different programmes to give information about **soil fortification**.
