

Action Project of Yuva Paryavaran Leader Students

Munazza Fatima, 11th std
Canossa Convent Girl's Inter College
Faizabad

Theme- Waste management

Objective- To make the public of my society aware regarding the problems related to environment and to make them realise the importance of 3R's.

Need of the project- Plastics are the cause of major environment problems. It is not only the environs which suffers, it causes a threat to wildlife, marinelife, human life and a local litter issue. A reduction in our use of them is essential in solving the environment problems they cause. The most effective way of reducing the amount of plastic litter in environment is to reduce our consumption. Recycling of plastic is desirable because it avoids accumulation in landfills. Recycling of waste plastics lead to the reduction of virgin materials and of the use of energy, thus also reduction of CO2 emission.

How you will achieve it-

- 1) Organizing environmental camps in school.
- 2) Various activities showing importance of recycle, reuse and reduce in schools.
- 3) Surveying in schools and shops with environmental problems and working on it.
- 4) Organizing camps to check environmental problems and working on it.
- 5) Overall surveying
