

Action Project of Yuva Paryavaran Leader Students

Neelakshi Yadav, 11th std
Shree Mahaprabhu Public School
Allahabad

Theme- Waste management

Objective- objective of this project is to make each and every one healthy. All the living beings should have the positive effect of environment on them. Our goal is to prevent the ways of harmful diseases like cancer etc.

Need of the project- We need a pollution free environment as we, everywhere have a kind of gadgets and appliances which has its values as well as disadvantages also. So, we need a pollution free environment because we are already having a lot of negative rays and effects of these gadgets on our environment and on our health. So we should try to reduce the pollution as much as possible. We cannot have a fully pollution free environment but, we can try to reduce it as much as possible. It will be beneficial to all the organisms around us. Our project will work for every type of organism. It will have a committee which will have a checking and working session once in a month or at the time when it will be needed. This type of project also motivates youth to fight against pollution and make a clean and pollution free environment.

How you will achieve it-

- 1) Awareness programmes to convey messages to all not to initiate pollution.
- 2) Speeches to aware people about the harmful effects of the appliances they use.
- 3) Rallies and cultural programmes to motivate people to save environment.
