

Action Project of Yuva Paryavaran Leader Students

Shivanshi Srivastava, 11th std
Shree Mahaprabhu Public School
Allahabad

Theme- water conservation

Objective- To harvest the rain water by installation of rain water harvesting systems.

Need of the project-

My project will definitely help the people in need

- As it suggest the ways to store the rain water by various methods.
- By which they can easily satisfy their basic needs
- If it will apply it will surely decline the water shortage.

After applying this method will lasts till much time.

How you will achieve it- I want to start from my area that is from my school. I will try to organize the speeches on the topic of water scarcity, waters importance etc. I will organize some debates so that people can have a clear view of my project and its concept.
