

Action Project of Yuva Paryavaran Leader Students

Vrinda Arora, 8th Std
La Martiniere Girls' College
Lucknow

Theme- Waste management

Objective- Initiating Awareness Among People about the Harmful Effects of using Polythene Bags and the Amount of Pollution and Harm which they are causing to the Environment.

Need of the project- My project will be really helpful in making the environment clean and green. The environment is needy for this kind of a project. If we all follow my project, then we can reduce the harmful effects of using polythene bags. If we all do not use polythene at all then we shall help in making the environment pollution free. We will be able to save the lives of many animals who suffer untimely death. This project will benefit the people, its surroundings as well as animals and plants. The soil would not be left barren and it would be flourished with crops. The project can be started as soon as possible and will last for an year. In this one year's time I will try to do my best to ban the use of polythene, make people aware about the consequences and its harmful effects. If I will see someone littering the place, I will immediately tell him to clean it. I will meet the Head of the Lucknow Municipality and tell them to impose a fine on people who will throw garbage on the road and drains and make them know the harmful effects of the polythene. My dream is to make India one of the best countries in the world.

How you will achieve it-

- 1) I will aware people by organizing a poster making competition.
- 2) I will be sticking those posters in the nearby areas.
- 3) I will meet my neighbours and shopkeepers to aware them about harmful effects of polythene.
- 4) I will visit the slum areas and teach the students how to make paper bags and will distribute it to the shops.
